

The content provides insights for a cybersecurity student on accessing resources and updates from the Cybersecurity and Infrastructure Security Agency (CISA), which is an official U.S. government organization. Here are some key actionable insights:

1. **Secure .gov websites**: Always look for "https" or a lock symbol when visiting an official .gov website to ensure that you're connected securely and can safely share sensitive information.
2. **Free Cybersecurity Resources**: CISA offers various resources, tools, and services for free, including Secure by Design, Secure Our World, Shields Up, and the ability to Report a Cyber Issue.
3. **News & Events**: Visit the CISA News & Events page to stay updated on the latest news, multimedia, and communications from the agency. This includes press releases related to cybersecurity incidents, collaborations with other organizations, and updates on various initiatives.
4. **Alerts & Directives**: CISA frequently issues alerts and directives regarding known vulnerabilities, active exploitation of software, and other cybersecurity-related matters. Be sure to check this section regularly for important information relevant to your work in the field.
5. **Upcoming Events**: Participate in CISA's webinars and events on various cybersecurity topics, including active shooter preparedness and best practices for protecting against potential threats. These sessions are open to stakeholders from all regions.
6. **Media Inquiries**: If you have any media-related questions or need more information about CISA's activities, contact the agency at CISAMedia@cisa.dhs.gov or call 703-235-2010.
